

Model Performance Test

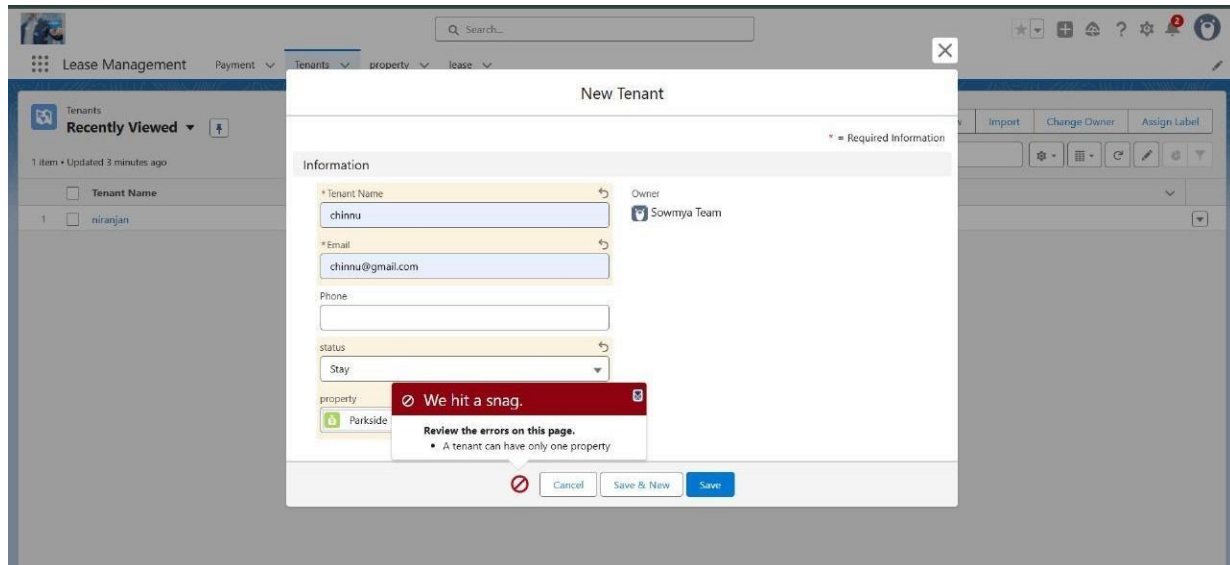

Date	26 JUNE 2025
Team ID	LTVIP2025TMID31649
Project Name	Lease Management
Maximum Marks	

Model Performance Testing:

Trigger Error:

Validation logic is applied when incorrect or mismatched data is entered during lease record creation (e.g. lease start date after end date).

System throws an error and prevents record creation.

Validation Check – Dates Different & End Date is Less:

Business rule checks that lease End Date must be after Start Date. If End Date is lesser, system shows validation error and restricts submission.

The screenshot displays the 'Lease Management' interface for a lease named 'supriya'. The 'Details' tab is active, showing the following fields:

- * Lease Name:** supriya
- Owner:** Sowmya Team
- start date:** 6/20/2025
- End date:** 6/19/2025
- property:** Search property...
- Created By:** Sowmya Team, 6/23/2025, 3:13 AM
- By:** Team, 6/26/2025, 7:38 AM

A validation error is displayed in a red box: "We hit a snag. Review the following fields: start date". A message above the end date field states: "Your End date must be greater than start date". The 'Activity' panel on the right shows no activities.

Validation Rule Check – Dates Same:

A validation rule ensures Start Date and End Date cannot be the same. System flags this as invalid and prompts user to revise inputs.

The screenshot displays the 'Lease Management' interface for a lease named 'supriya'. The 'Details' tab is active, showing the following fields:

- * Lease Name:** supriya
- Owner:** Sowmya Team
- start date:** 6/20/2025
- End date:** 6/20/2025
- property:** Search property...
- Created By:** Sowmya Team, 6/23/2025, 3:13 AM
- By:** Team, 6/26/2025, 7:38 AM

A validation error is displayed in a red box: "We hit a snag. Review the following fields: start date". A message above the end date field states: "Your End date must be greater than start date". The 'Activity' panel on the right shows no activities.

Flow Testing – Payment Update:

Flow automation updates Payment Status automatically upon payment log entry.

Test confirms the status updates accurately and triggers notification.
